## From the winner:

My daughter and I agreed line one was pretty clearly the dam. We tossed around the idea of 5 and 58 being years that something happened, and in Lowell that would probably be a fire or a flood! My husband remembered something about a fire around Molly Wepman's store, so I did a little searching on the museum website and confirmed it, also finding the flood in 1905. I recognized "quick" from the King, Quick and King Sawmill that was in the river just north of the bridge. Then I thought maybe "planted for a keepsake" was the Christmas tree, but before checking the tree I wanted to read the historical board nearby and see if there were any more clues. I thought, "Hey, this board was 'planted' as a keepsake, so maybe I should check here!" And there it was! I found it but it really was a group effort by Jim, Judi and I, and some friends at the Riverwalk who were discussing ideas, too! Our family has been enjoying trying to solve these riddles the last few weeks... thanks for the fun!
